

# Model B2

## Back Pressure Regulator

### 1/4" – 1/2" (DN8 – DN15)

The Model B2 is designed for gases and liquids with control ranges up to 750 psig (51.7 Barg). Flow coefficient of 0.05, 0.10, 0.20, and 0.30 are available. This versatile back pressure regulator can be ordered with a variety of options to meet your system demands.

### GENERAL SPECIFICATIONS

Inlet / Outlet Size:	1/4", 3/8" & 1/2" (DN8, DN10 & DN15)
Cv Capability:	0.05, 0.1, 0.2 and 0.3
Inlet Pressure: (working pressure)	1-750 psig (.07-51.7 Barg) 1-250 psig (.07-17.2 Barg) for Sanitary Service See Position 11
Body End Connections:	FNPT or Tube Ends, Tri-Clamp -1/2" (DN15) Only
Body / Spring Chamber Material:	316L SST/316L SST Brass/6061 AL <u>Sanitary Construction:</u> Interior of body surface Electro Polished to 16 micro-inch Ra finish with Electro Polished exterior.
Wetted Material:	See Position 6
Temp. Limits:	TFE - -45 to 400°F (-42.7 to 204°C) Kalrez - -45 to 575°F (-42.7 to 301°C) FKM - -20 to 300°F (-28.9 to 149 C)
Range Spring Material:	Std: Steel, Sanitary Service: SST
Composite Knob: (Standard)	-50 to 200°F (-45.6 to 93°C) For temperatures outside (Std.) knob range see Options for Colored Knobs.
Operating Temp. Range:	Brass - -20 to 400°F (-28.9 to 204°C) SST - -20 to 500°F (-28.9 to 260°C)

### TYPICAL APPLICATIONS

- Economizer Circuit
- Analyzer Back Pressure
- Suitable for Corrosive
- Suitable for High Purity Gas

### FEATURES

- Accurate Adjustment
- Low Internal Volume
- Low Operating Torque
- Suitable for corrosive applications

### FUNCTIONAL PERFORMANCE

Temperature Coefficient:	0.16 psig/ °F (0.01Barg°C)
Design Proof Pressure:	2 x working pressure
Internal Volume:	6.9 cc
Design Leakage:	
Outboard -	1x10 <sup>-9</sup> scc/sec He
Inboard -	1x10 <sup>-9</sup> scc/sec He

**⚠ CAUTION**

**This is not a safety device and must not be substituted for a code approved pressure safety relief valve or a rupture disc.**

## STANDARD CONSTRUCTION

### **Captured Vent**

The captured vent feature is designed to safely vent process fluid when handling toxic or hazardous media. The user can easily pipe this vent to a safe location. It features a 1/8" FNPT port located on the spring housing. This feature can be incorporated into a self-relieving regulator that provides an additional port to permit the piping away of the expelled media.

## OPTIONS

**NACE Construction - ( R )** in Position 6. - Internal wetted portions meet NACE standard MR0175, when the exterior of the regulator is not directly exposed to a sour gas environment, buried, insulated or otherwise denied direct atmospheric exposure. SST/SST body/spring chamber materials only. Inconel w/TFE liner, 316L SST w/PCTFE seal.

**Dome Loaded - ( 0 )** in Position 11. - The dome loaded option allows for regulators to be loaded from remote location to change pressure settings. **NOTES:** Diaphragm failure will result in loading fluid to mix with the process being controlled. Maximum Loading Pressure is 125 psig (8.6 Barg).

**Mounting Bracket - (5)** in Position 14. - The mounting bracket is a base, or step type. The material is 303 stainless steel. The bracket mounts to the back of the single stage, and back pressure regulators, via 10/32 screws.

**Panel Mount - (C)** in Position 14. - The panel mount feature requires a panel cut out of 1-3/8", complete with a threaded spring chamber, and a panel mount ring to secure the regulator.

**Tamper Proof - (1)** in Position 15. - In this feature the control knob is removed and replaced with an acorn nut. The user can set the outlet pressure and securely tighten the nut, preventing any unwanted adjustments on the regulator.

**Colored Knobs - (2, 8 and W)** in Position 15. - In this feature the control knob is anodized aluminum either in black, blue or red, compared to the standard red composite knob. This allows for color coding of processes. Temperature range: -55 to 300°F (-45.6 to 149 °C).

**Vacuum Assist Spring - (V)** in Position 16. - In this feature a vacuum assist spring is placed under the diaphragm. This spring prevents the diaphragm from collapsing during a vacuum purge.

**Cleaned for Oxygen Service #S-1134 - (M)** in Position 17. - This is a requirement for gaseous oxygen rich environments. All regulators requiring advanced cleaning shall be processed according to strict guidelines. **NOTE:** Design Pressure Rating shall not exceed 375 psig (25.8 Barg) when body material is SST and process medium is oxygen.

**Cleaned per Spec. #S-1542 - (N)** in Position 17. - Cleaning identical to that of #S-1134, but not labeled for application in oxygen service. NOT suitable for Oxygen Service.

**Sanitary Construction #S-1576 - (P)** in Position 17. - SST Construction with Smooth SST Knob - Interior of body surface Electro Polished to 16 micro-inch Ra finish with Electro Polished exterior. NPT Connections. Tri-Clamp Ends Size 1/2" only. Unit is cleaned to Cashco Spec. #S-1576. Comply with FDA 21 CFR 177 2600 & USP Class VI material classification.

## DIMENSIONS

English Units In. & lbs.					
Size	A	B	C	C Dome Load	Wt
